## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-5, drawn to a data processing device and method of operating such a device, classified in class 712, subclass 34.

II. Claims 6-7, drawn to a method for compiling a program into a sequence of instructions, classified in class 717, subclass 240.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as it's operation does not require the compiler given in claims 6 and 7. The instructions executed by the processor could be hand-coded or produced by another compiler. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Further, the Examiner had warned the Applicant in the previous Office Action that if claim 6 was made independent, a restriction requirement due to related subcombinations may be set forth.

4. A telephone call was made to Michael J. Ure on 11/30/04 to request an oral election to the above restriction requirement, but did not result in an election being made because the Examiner's phone call was not returned.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shane F Gerstl whose telephone number is (571) 272-4166. The examiner can normally be reached on M-F 6:45-4:15 (First Friday Off).
